LAKEMASTER

WITH VX TECHNOLOGY

TREASURE HUNTING STARTS WITH A GOOD MAP.

No matter where the journey takes you, only Humminbird gives you access to the detail and one-of-a-kind features of LakeMaster and LakeMaster Premium charts, providing you the information and accuracy needed to eliminate unproductive water and find prized fishing spots faster. Now with VX Technology standard, these optional charts will help you seize every moment on the water.

 **HUMMINBIRD®**

VX TECHNOLOGY

Vector-accelerated technology provides exceptional map performance and customizable color palettes.

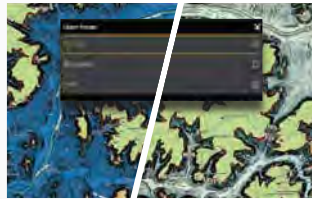

COMPATIBLE MODELS

- » APEX (all models)
- » SOLIX (all models)
- » HELIX (G3/G3N and newer)

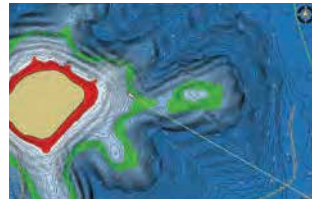

SMARTSTRIKE BUILT-IN

SmartStrike is your digital fishing guide, letting you predict where the fish will be next. Now built into LakeMaster and LakeMaster Premium cards, SmartStrike allows you to enter search parameters like season, time of day, temperature and targeted fish species to create custom charts that highlight areas of the map where fish are most likely to be biting. It's like having your own fishing guide with decades of experience in the boat with you.

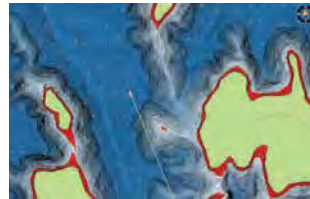

THREE CHART PRESETS

Simple and easy to change between your own custom view settings.

DEPTH HIGHLIGHT

Highlight up to four depth ranges so you can target productive water and stay on the fish.

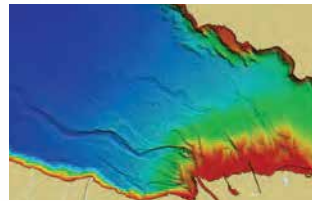

SHALLOW WATER HIGHLIGHT

Red shading highlights shallow water areas on an adjustable range from 0 to 60 feet.

WATER LEVEL OFFSET

Synchronize the depth contours and shorelines of your LakeMaster charts with actual water levels of lakes, reservoirs and rivers.

2D SHADED RELIEF

Quickly identify fish holding areas with 2D shaded relief, which make bottom detail and depth changes easy to spot.

AERIAL IMAGERY

Navigate confidently and find new fishing spots with the help of aerial imagery.

CONNECT YOUR MAPS TO YOUR TROLLING MOTOR

Unlock more from your LakeMaster chart with the power of One-Boat Network™. Pair your Humminbird chartplotter and a compatible Minn Kota® trolling motor to control your motor right from your unit. For hands-free fishing, your Minn Kota can automatically follow a depth contour on your LakeMaster chart.
